

# Construction Evolved

Data Driven.  
Experience Informed.

**Graywolf®**

A DBM GLOBAL COMPANY

### WE START & END WITH SAFETY

The safety and well-being of our employees is the most important responsibility that we have as a company. We ensure our employees return home the same way they left, unharmed.

By involving our inhouse safety department before we provide an estimate, our safety plan is considered from day one and adhered to the projects last day through a project-based data informed dashboard that enables a predictive safety environment.

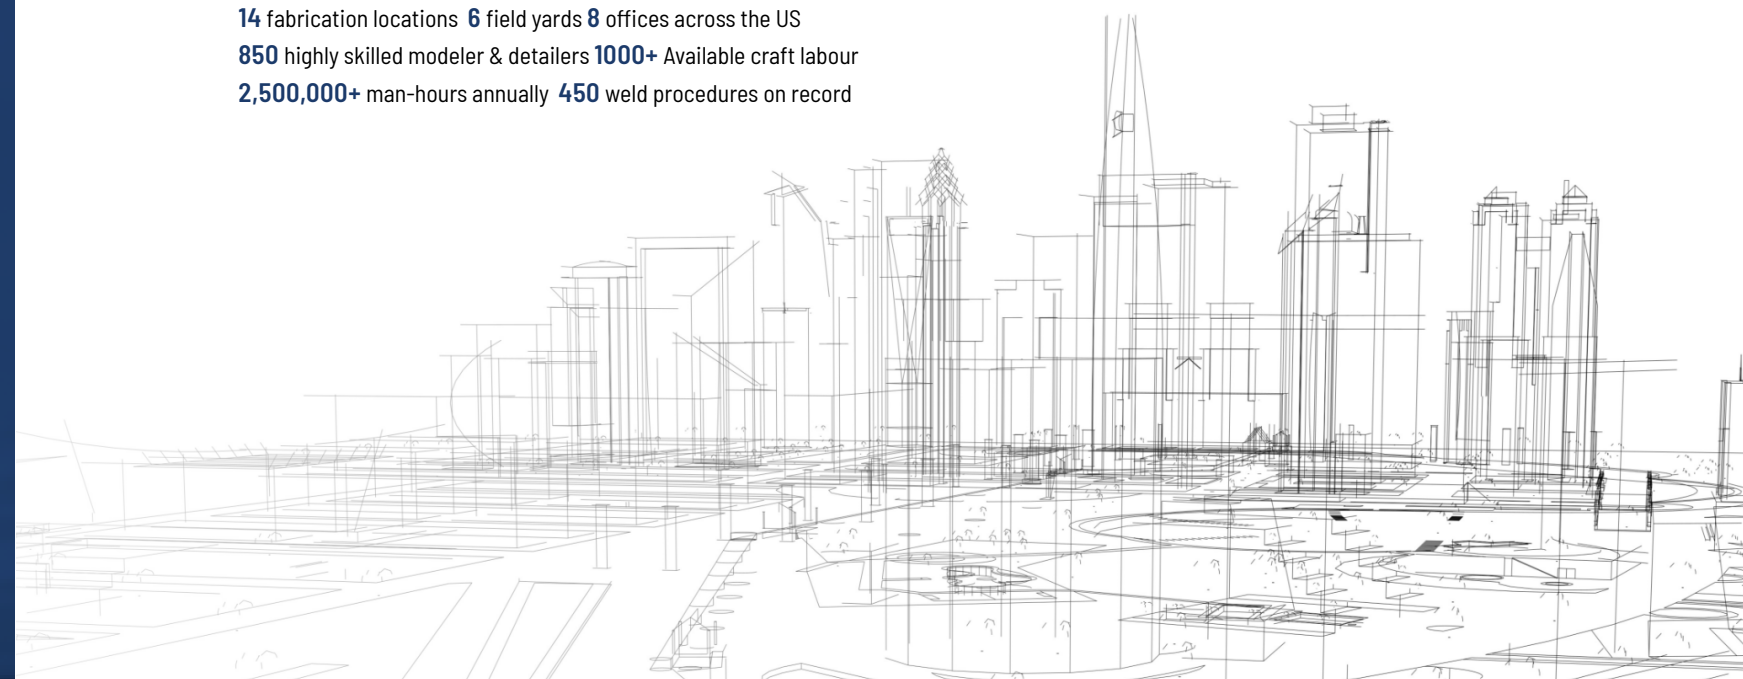

**+** Our goal is to eliminate all worksite incidents.

**43**  
YEARS OF  
EXPERIENCE

**0.81**  
EMR

**5000+**  
COMPLETED PROJECTS  
IN THE LAST 10 YEARS

**14** fabrication locations **6** field yards **8** offices across the US  
**850** highly skilled modeler & detailers **1000+** Available craft labour  
**2,500,000+** man-hours annually **450** weld procedures on record

## We are builders first

From nearly half a century of being builders, we have come to believe that the traditional construction model fractures shared knowledge and a project's continuity.

We believe there is a better way.

### THE NEXT GENERATION IN PROJECT DELIVERY

We are a world leading construction company that provides solutions for your asset's lifecycle from design through to fabrication, construction and facility management.

By integrating and leveraging both the construction and technology expertise held across our family of companies, we are uniquely positioned to deliver a de-risked end to end solution to both industrial and commercial construction markets.

Building upon a foundation of world class technologies and model-based workflows we manage the evolution and utilization of critical data from early design through to an operating asset.

This end to end capability allows us to inform project execution strategies that optimize how projects are delivered that eliminate waste and risk typically experienced in the transition between design to construction and construction to operations.

## PRECONSTRUCTION PLANNING

Starting with the end in mind our multi-disciplinary team of experts resolves project challenges before they have an opportunity to develop. By leveraging 3D models and our purpose-built technologies, we take disparate data sets and transform them into critical management tools allowing for early yet informed decision making that ultimately mitigates project risk while expediting schedule.

- + Digital Engineering
- + Modeling & Detailing Services
- + Estimating
- + Design Assist
- + Scheduling, Budgeting and Project Controls
- + Constructability Planning
- + Complex Logistics Planning
- + Procurement

## FABRICATION & MODULARIZATION

Our decades of construction and fabrication expertise, combined with our nationwide network of fabrication facilities and specialty contractors, ensures we are best placed to deliver projects of any scope or scale. With safety underlying all fab and erect decisions, we continuously seek to optimize shop time and develop strategies to drive hours out of the field.

- + Tanks & Vessels
- + Structural Steel
- + Heavy Plate & Misc
- + Piping
- + On-Site & Off-Site Modularization

## CONSTRUCTION SERVICES

Our sizable and diverse labor force ensures we are always prepared to service any project needs. We have developed industry leading internal training facilities and programs to develop and maintain the quality and safety of our craft workers. Coupled with our model-driven abilities to plan work, we have the optimal combination of people, processes and technologies to deliver any project.

- + Civil
- + Structural Steel
- + Field Erected Tanks & Vessels
- + Equipment Installation
- + Piping
- + Electrical & Instrumentation

## FACILITY SERVICES

Model utilization does not end with construction. We have developed the systems and procedures required to evolve the 3D model into a digital twin for use in operations. Combining these technologies with real-time asset data allows our embedded maintenance staff to optimize the operation of your facility and ensure predictability with all maintenance activities.

- + Furnace Maintenance & Rebuilds
- + Roll Alignment
- + Motor Alignment
- + Potline Maintenance
- + OH Crane Maintenance
- + Pipe Rework
- + Fluid & Grease Maintenance
- + Alignment Checks
- + Structural Modifications
- + Burner Inspection/Modification
- + ASME Welding
- + Facility Management
- + Shutdowns & Turnarounds
- + Relocation & Commissioning

Project experience

## ● OFFICE LOCATIONS

## 📍 GRAYWOLF FABRICATION SHOPS

On top of our own shops, we have access to an additional 13 within the DBM Global platform of companies, for a total of 2.2M square feet under roof.

Invite GrayWolf to join your team early in the process to gain visibility and de-risk your project with our end to end expertise.

### HEADQUARTERS

2205 Ragu Drive  
Owensboro, KY 42303  
(270) 854-2299
